

ARTICLE: URDANETA CITY UNIVERSITY STRENGTHENS CLIMATE ADAPTATION THROUGH COLLABORATION WITH NON-GOVERNMENTAL ORGANIZATIONS (NGOS)

Urdaneta City, Pangasinan — Urdaneta City University (UCU) actively supports climate change adaptation by fostering strategic collaborations with non-governmental organizations (NGOs). These partnerships aim to enhance community resilience, promote sustainable practices, and strengthen the university's role as a catalyst for environmental stewardship.

Through joint programs with NGOs, UCU engages in knowledge-sharing initiatives, workshops, and community-based projects that address the impacts of climate change. These efforts equip students, faculty, and local residents with practical skills to respond to environmental challenges, implement adaptation strategies, and promote sustainable livelihoods.

By collaborating with organizations specializing in climate resilience, UCU extends its outreach beyond academic spaces, ensuring that vulnerable communities benefit from expertise, technology, and resources. This partnership model supports Sustainable Development Goal (SDG) 13.3.4, emphasizing the integration of climate change measures into policies, education, and community action.

UCU's collaboration with NGOs demonstrates the university's commitment to bridging academic knowledge with real-world solutions. Through these partnerships, UCU not only contributes to local climate adaptation but also empowers students to actively participate in sustainability initiatives, fostering a culture of environmental responsibility and collective action.
