

URDANETA CITY UNIVERSITY CHAMPIONS SDG 15 IN THE BONSAI EXHIBIT: “URDANETA CITY’S GREEN THUMBS SHINE”

In alignment with this celebration of artistry and environmental consciousness, Urdaneta City University (UCU) proudly reaffirmed its steadfast commitment to supporting all United Nations Sustainable Development Goals (SDGs), particularly SDG 15: Life on Land. The University consistently takes part in initiatives that promote environmental preservation, biodiversity protection, and ecological balance.

Through its active participation and encouragement of nature-centered events like the Bonsai Exhibit, UCU strengthens its advocacy for sustainability and ecological awareness—values that continue to inspire its students, faculty, and community partners. By supporting such green initiatives, UCU not only promotes cultural appreciation and artistry but also upholds its role as a catalyst for a sustainable and greener future.

Indeed, the “Urdaneta City’s Green Thumbs Shine” exhibit is more than a celebration of miniature trees—it is a living testament to how art and environmental stewardship can harmoniously grow together. And as UCU continues to champion sustainability, it stands firm in its mission to nurture not only minds but also the land that sustains us all.

MAKE SDG#15 A REALITY
